**Proposed: equity investment participation in the plant construction project.**

The author and developer of the "innovative technology of the vortex electromagnetic layer Reactor (RVES)" in the field of materials processing offers:

Equity investment participation in the construction project of a plant for the serial production of "Innovative technology based on "RVES"" for various fields of industry and agriculture, including perfumery and cosmetics.

Available:

- 1 - Description of the technology, methods and scope of application.
- 2 - Design documentation in the environment of the T-FLEX CAD program.
- 3 - Conclusions and research results.
- 4 - Patents of R.F. for invention, 8 pcs.
- 5 - Certificates for serial production.
- 6 - Laboratory installation "RVES-1", for conducting physico-chemical and mechanical-physical experiments.
- 7 - Installation "RVES-OPM1" for pre-sowing processing of agricultural materials.
- 8 - Technical and technological description of calculations and formulas in the production of technologies using "RVES"
- 9 - Evaluation of intellectual property based on scientific research, laboratory and test results conducted over 12 years, integrated marketing, determination of the sales market and the focus group of Consumers in the fields of Industrial production, Agriculture, Food industry, Perfumery and cosmetics, housing and communal services, Petrochemicals, Construction industry, the aggregate indicative value of a potential scientific resource and the efficiency of "RVES". The use of "RVES" in the areas of the National Economy has, along with high environmental indicators, a high economic effect and a Coefficient of Production Activity (efficiency).
- 10 - Business plan.

***The cost of equity participation in the NPO CASCADE is 40% =1.4 million dollars***

***The cost of the entire project is – 12.5 million dollars***

Sincerely, Gen. Director Petr Rubeko.
